

Grecia, partea a doua: Olympiada, Aristotel si plaja Cuba

Grecia, partea a doua: Olympiada, Aristotel si plaja Cuba

Am fost la mare, in **Grecia**, si-n iulie, si-n august dar parca nimic nu se compara cu luna iunie. Sfarsitul lui iunie e intotdeauna fantastic: putini turisti, plaja aerisita, caldura suportabila, apa perfecta...chef de aventura ☐

Asa am ajuns la Olympiada, la doar cativa km de Stavros, si-apoi imediat la Ancient Stagira (vechea cetate, in care s-a nascut Aristotel), unde Bogdi s-a simtit ca prins intr-o alta dimensiune din care nu mai voia sa evadeze. A facut parkour pe toate zidurile alea abrupte, pline de istorie, si-o suta de poze cu telefonul, desi afara erau vreo 45 de grade C!!!!

Salbatica plaja Cuba, bine pitita intre versanti, ni s-a dezvaluit ultima, dar a si fost cea mai mare descoperire!!! O plaja mica, cu apa cristalina, de unde se zureau zidurile lui Aristotelis, cu cele mai curate sezlonguri si cel mai bun frappe, cu zeci de pestisori ce ne roiau pe la picioare, ori de cate ori ne afundam in nisip.

Langa stanci, unde era si o „mare” de corturi, s-au intamplat scufundarile (v-am povestit **aici** despre Bogdi, transformat in Aquaman ☐). Nu stiu cum, dar a reusit sa stea sub apa ore intregi, fara sa oboseasca. Iesea numai cat sa respire si-apoi se scufunda din nou, si din nou, cu aceeasi exaltare ca in prima clipa. Mi-a strans doi pumni de scoici, pe care le-am adus acasa-ntr-un pahar, si mi-a relatat cu lux de amanunte cati pesti a vazut, ce culoare aveau, daca erau singuratici sau in bancuri etc. Si de aricii de mare s-a bucurat, desi nu erau atat de multi ca si la Olympiada, unde, ca sa poti intra in siguranta in mare, paseai pe un „ponton” de saci umpluti cu nisip :)))

A fost incredibil de frumos!!! Imi pare rau insa ca nu am reusit sa strabatem tot traseul de la Aristotel (ne-ar fi luat o zi intreaga), pentru ca era chiar in miezul zilei si era sufocant, iar piciorul meu nu dadea deloc semne ca ar putea urca si cobori un deal intreg. Ne-am distrat maxim cand am verificat harta sitului si am descoperit ca eram doar un punct pe harta ☐ ...dar ne-am si intristat la gandul ca am ratat atatea obiective. Poate ajungem la anu', sau ajungeti voi inaintea noastra :))

Biiiiine, nu va mai plictisesc cu alte povestiri, va pun pozeeee!!!
Multe, multe!!!

Olympiada:

Olympiada, mai intai, cu pontonul ei romantic...si aricii de mare...si apa linistita:

Cand se lasa seara, cred ca e si mai frumos aici!

Laura Sava

Aici, la terasa asta, langa malul marii, am luat pranzul:

Burgeri, salate, un meniu mai modern ☐

ΑΡΧΑΙΑ ΣΤΑΓΕΙΡΑ

Στους δύο λόφους της χερσονήσου των Σταγείρων αποκαλύφθηκαν σημαντικά κτίσματα της γενέτειρας του Αριστοτέλη. Η ανασκαφική έρευνα, που ξεκίνησε το 1990, έδειξε ότι οι πρώτοι άποικοι από την Ανδρο εγκαταστάθηκαν στο Βόρειο λόφο, περί τα μέσα του 7ου αιώνα π.Χ. Η πληθυσμιακή αύξηση οδήγησε στην επέκταση της πόλης και στο Νότιο λόφο, στις αρχές του 5ου αιώνα π.Χ. Τότε χτίστηκε και το ισχυρό τείχος που περιβάλλει την πόλη, ενισχυμένο με κυκλικούς και τετράγωνους πύργους.

Στην αγορά της πόλης, που βρίσκεται στον αυχένα μεταξύ των δύο λόφων, ερευνήθηκε μία Στοά, δίπλα σε δημόσιες αποθήκες και καταστήματα. Αποκαλύφθηκαν ακόμη η ακρόπολη, ιερά, σπίτια και άλλα δημόσιου και ιδιωτικού χαρακτήρα οικοδομήματα, που συνθέτουν τον γενικό ιστό της πόλης.

ANCIENT STAGEIRA

Significant remains from Aristotle's birthplace have been discovered on the two hills on the Stageira peninsula.

Excavations begun in 1990 and revealed that the first colonists from Andros settled on the north hill in about the mid-7th century BC. As the population increased, the city spread to the south hill early in the 5th century BC. The strong wall around the city was built at this time and fortified with round and square towers.

In the agora, which is situated between the two hills, a stoa has been located adjacent to public storerooms and shops. Excavations have also uncovered the citadel, sanctuaries, houses, and other public and private buildings, which make up the urban fabric of the city.
